SD500 spindle servo drive

Intelligent manufacture in China 2025

Professional product in machine tool industry

SD700 High performance servo system

Special drive AC300-Y for punch machine industry

Special drive AC300-C for spindle industry

High efficient, accuracy machining ,high automation, and high reliability have become the key index of the machine tool industry around the world.

Generally , CNC machine tools are inseparable from electronic control; For more than a decade, VEICHI deep plough machine tool industry is dedicated to creating the most professional machine tool industry products.

Independently developed motor control system for machine tool industry: SD700 series high-performance servo system and SD500 series spindle servo system perfectly fit " Intelligent manufacture in China 2025", cooperate with CNC manufacturers to provide a complete set of electronic control solutions for the machine tool industry, creating value for customers .

Multi solution on CNC machine tool industry

CNC milling machine, CNC lathe, machining center, CNC boring machine, gantry machine tool, CNC vertical lathe, CNC grinder, lathe and milling compound machine tool and other CNC equipment spindle drive

Tool magazine

Lathe

Engraving machine

Drilling and tapping Center

SD500 series spindle servo system

Integrated quality and the ingenious

SD500 spindle servo drive model explanation

Installation dimensions

Model	Overall dimensions (mm)					Installation dimension(mm)					Installation aperture
	W	H	H1	D	D1	W1	W2	H2	A	B	
SD500-004D-*	100	242	231	156	149	84	86.5	231.5	8	5.5	3-M4

SD500-7R5D-*	116	320	307.5	176	169	98	100	307.5	9	6	3-M5
SD500-011D-*											

Model selection

Model	Input power	Rated AMP (A)	Motor(KW)	Brake unit	Adaptive resistor (Ω/KW)
SD500-004D-	Three phase 380V 50/60Hz	10	4	built-in	75/1.0
SD500-5R5D-		13	5.5		75/1.0
SD500-7R5D-		17	7.5		50/1.5
SD500-011D-		25	11		40/2

High precision in speed ,position mode ,positioning within ±1pulse

ARM+CPLD framework ,to meet higher performance requirements

Encoder cable break detection , guarantee the reliable system operation

Auto load inertia learning and loops parameters tuning

Full close loop vector control , dual encoder ports

Multi positioning points ,rigid tapping within ±2% precision

Design of book-type narrow-body structure to save installation space

Independent cooling duct and power components

Spindle servo motor model explanation

Standard diagram

Special drive AC300-C for spindle industry

Simple shape, strong interior

Available open/close loop on AM/PM motor

Vector platform support 600Hz output

Accurate torque excitation decoupling ,excellent dynamic response

Book narrow structure design , optimize installation space

New cooling duct design ,DC fans heat dissipation ,high IP,safe and reliable

Package parameters for spindle machine ,brief the parameters setting

Reduce motor noise with random carrier

Strong response on load

Special drive AC300-Y for punch machine industry

Stable ,reliable ,safe

Book narrow structure design , optimize installation space

European-style terminals for easy wiring

Accurate torque excitation decoupling ,excellent dynamic response

Full motor auto tuning in dynamic /static state

Overcurrent ,overvoltage suppression function

Various expansion module , support customization requirements

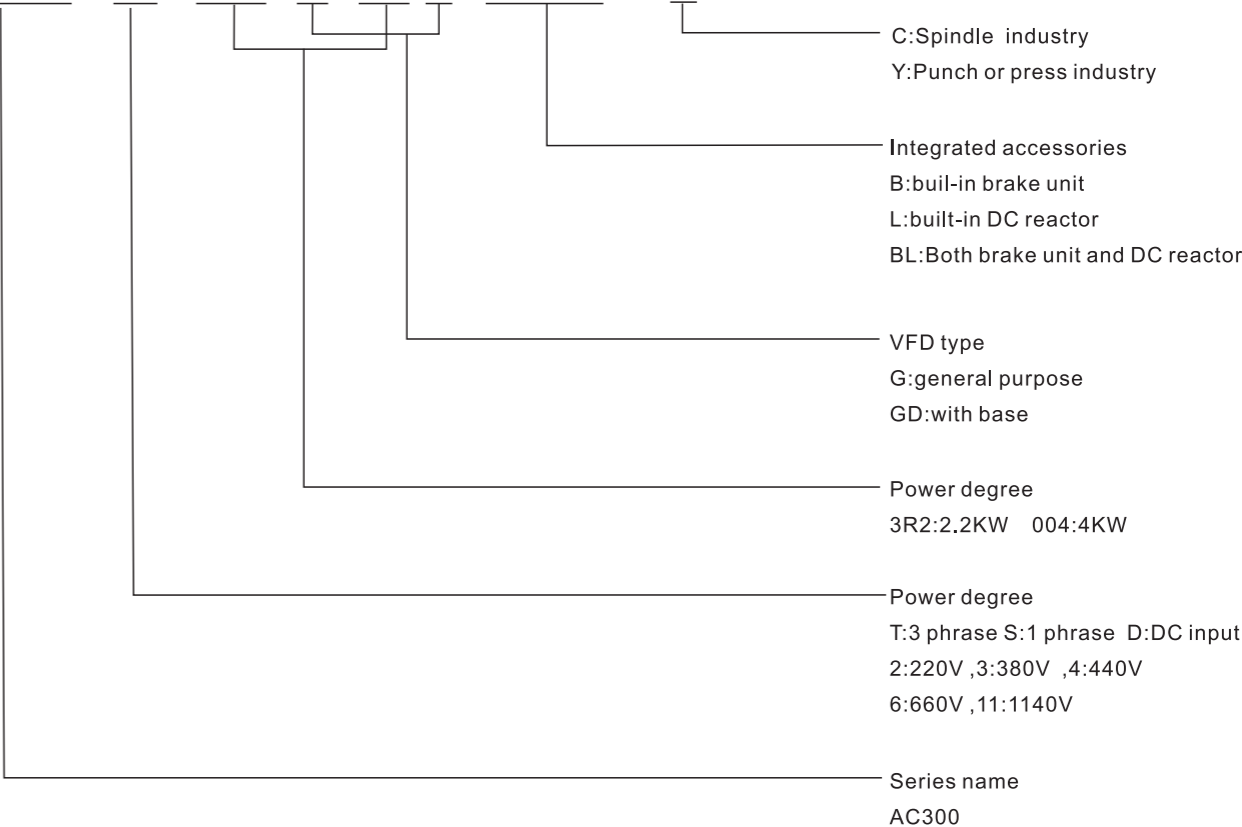

Fast and stable speed tracking ,even 1Hz speed

Random carrier to reduce motor noise

Model explanation

SD700 Series high performance servo system

Perfect combination of extreme and concision

Speed loop bandwidth response up to 3KHz

24Bit absolute encoder , communication speed up to 4Mpps

Bandwidth ,PID loops gain parameters auto tuning

Powerful PC debugging software , multi channels to monitoring ,easy to use

Auto inertia identification ,loops gain and friction compensation parameters setting

Support multi segment vibration suppression ,inhibit resonance effectively

Robust control ,stable operation within 30 times inertia

New structure design ,compact , space-saving

Series configuration drawing

Standard wiring diagram - position mode

Application

Slanting lathe solution

Solution advantage

- 1.Feed axis, power head servo supports a variety of bus protocols, (Mechatrolink-□, Mechatrolink-□, EtherCat) power head dedicated servo motor large output torque, the maximum speed up to 6000 rpm, and the milling plane is smoother;
- 2.Standard configured dual PG interface ,receive feedback from servo motor and spindle motor at same time ,higher control precision ;
- 3.Servo integrated AM/PM motor control mode ,open /close loop mode ,large torque in low frequency ,excellent ACC/DEC response ability ;
- 4.Adapt to all kinds of systems, smooth processing cutting speed, delicate processing of workpiece lines, high gloss.

CNC lathe & milling machine combination machine solution

Solution advantage

- 1.Feed axis, power head servo supports a variety of bus protocols, (Mechatrolink-□, Mechatrolink-□, EtherCat) power head dedicated servo motor large output torque ,the maximum speed up to 6000 rpm, and the milling plane is smoother;
- 2.Spindle servo positioning stop in full close loop ,within ±1pulse ;
- 3.The dedicated servo of the tool magazine can drive up to 32 knives, with high positioning accuracy and repeat positioning accuracy, and quick tool change;
- 4.Adapt to all kinds of systems, smooth processing cutting speed, delicate processing of workpiece lines, high gloss.

Other application

VEICHI Electric industrial product are comprehensive applied on engraving and milling machine, tapping center , wooden engraving machine , gantry milling machines, press equipment, and work closely together with system manufacturers to provide optimal solution to customers;

Company profile

Founded in 2005, VEICHI Electric is a national high-tech and a “dual-soft ” enterprise engaged in the research, development, production and sales of industrial automation products. It has established two research and production bases with independent intellectual rights in Shenzhen and Suzhou. The ever-increasing ability to innovate, highlighting flexible customization capabilities, and increasingly improved delivery capabilities have earned the trust and cooperation of customers around the world.

The company's products cover the general VFD, servo and motion control system, integrated special drive and Internet of Things, etc., and provide advanced industry integrated solution and design for printing and packaging, pumps, machine tools and compressors, hydraulic servo, lifting, textile and other industries. Product development and design, comprehensive product development testing and automated information production, to provide customers with the most optimized industrial automation system solutions.

The core talents and backbone talents in the product R&D field of the industry meet the needs of talents in future R&D planning. The company has independent intellectual property rights and core technologies, and at least 10% of annual sales revenue will be invested in product development.

In the future, VEICHI Electric will continue to drive the endless brand strength and create a better tomorrow with you.
